5. Bruksvallarna - Ramundberget

Green. 28 km, 2-3 hours.

A mostly easy tour with some trixie parts where it's best with a mountainbike.

Starting from Bruksvallarna you can instead of the main road choose the Roller Ski road up to Ramundberget, it starts from Bruksvallarna, to the right of the road just beyond the turning to Stigmyhrs, Bruksvallarnas Stugby. The Roller Ski road offers a smooth coating surface, hilly and cycling free of cars, but be prepared for roller-skiers and other cyclists. You get many great views up through the valley that includes Skarsfjället with its characteristic form.

After over 7 km of the track, turn the coated road 90 degrees left, you run out on the road and take to the right and cross the small legendary Ramundbergets Fjällgård. Continue further on the gravel road past the campsite and you crosses a holiday village with typical härjedalsk building style, walls of tree and grass on the roof. You are now running an old drive road from Ramundberget towards Klinken.

After a couple of kilometers, you will reach a parking lot where many Guldturs hikers usually park. From this point we are not allowed to do any markings, because of land owners, so if you want to continue then do it on your own. After a short break it's time to turn back the way you came.

Once you have arrived at Ramundberget Fjällgård you can take the opportunity to buy something to drink and eat.

When you continue back to Bruksvallarna you can choose to follow the main road or turn onto the roller ski road again.
